

## **Currently available AQA Unit Awards:**

The structure of the construction/trade skills course allows students to creatively approach the associated unit awards. As such, each learner in a group may engage with the certificates in the form of a different project. We try and accommodate this as much as possible. It is also viable for students to work towards certification instead of projects which incorporate their elements. Below is a list of the currently offered AQA Unit Awards – however, if a student has a particular area of interest or a focus for their further education additional, specific awards can be put forward.
